

Name NHS/CHI number DoB

Form IHA-C LOOKED AFTER CHILDREN

CONFIDENTIAL

Initial Health Assessment

Recommended for children from birth to 9 years

CoramBAAF children's health assessment forms

This form is part of an integrated system of forms, including:

- Consent Form (consent for obtaining and sharing health information)
- Form M (mother's health)
- Form B (baby's health)
- Form PH (parental health)
- Form IHA-C (initial health assessment for child from birth to 9 years)
- Form IHA-YP (initial health assessment for young person 10 years and older)
- Form RHA-C (review health assessment for child from birth to 9 years)
- Form RHA-YP (review health assessment for young person 10 years and older)
- Form CR-C (carers' report – profile of behavioural and emotional wellbeing of child from birth to 9 years)
- Form CR-YP (carers' report – profile of behavioural and emotional wellbeing of young person aged 10–16 years)

Guidelines for completing Form IHA-C

Who should complete the form?

Part A – to be completed by the agency/social worker

Part B – to be completed by the examining health professional, either a doctor or a nurse

Part C – to be completed by the examining health professional

Part D – may be used for data collection if desired by the responsible LAC health team

Purpose of the form

- To help health practitioners fulfil the regulatory requirements that exist throughout the UK for each looked after child to have a holistic, comprehensive health assessment and a health care plan in place prior to the first LAC review.
- To provide the framework for this initial health assessment and provision of a written summary health report which will be used to formulate the health recommendations for the child care plan.
- To record the child's wishes and feelings regarding their present and future health, and provide an opportunity to discuss any concerns.
- To provide carers and professionals with important health information on the child, and provide a foundation for future health reviews.
- To provide the basis for reports for adoption panels, discussions with prospective adopters at matching and possibly to inform court proceedings.
- To provide the child with details of their past health history on reaching adulthood and lay the foundations for the involvement of children in their own health care.

The forms have been revised after wide consultation and feedback collected over 10 years. They are designed for use throughout the UK, although it is recognised that regulations across the four countries differ and that practice varies across regions depending on local circumstances. To ensure that the forms meet local needs and processes, they may be used flexibly – for example, if information has been recorded previously and is accessible within the health record, it is not necessary to duplicate it.

Similarly, not every question or prompt will need to be followed for each child and clinical judgement

Name NHS/CHI number DoB

should be exercised.

Part B should be completed by the assessing health professional who must have relevant experience and training to at least Level 3 of the RCPCH and RCN Intercollegiate Competencies. Regulations in England and Northern Ireland require a doctor to undertake the assessment; however, in Scotland and Wales, this may be carried out by a doctor or nurse. If the child is followed in a specialist or disability clinic, it may be most appropriate for a practitioner from that team to complete the assessment.

This examination and assessment are not required if they have already been carried out by a suitably qualified health professional in the three months immediately preceding the date on which the child began to be looked after by the local authority. However, the existing health plan should be reviewed and updated to take account of the child's changed circumstances. Additionally, there may well be circumstances in which the child's history or current presentation warrants further comprehensive examination or assessment. This will be a matter for individual clinical judgment.

Secure email **must** be used when sharing relevant information on these forms with other agencies. Practitioners should be familiar with the systems in use in their locality and protocols for sharing confidential information.

Part A and procedure for social worker prior to health assessment:

- Part A contains important demographic, social and legal information that is required by the assessing health professional prior to the assessment and **must be completed in full by the social worker/local authority**.
- The social worker must state the name and contact details of the agency health adviser to whom the form should be returned. The child's legal status and holder/s of parental responsibility/ies must be indicated.

Consent to access health information

- In order to meet standards set out in national guidance, information on past health history, including birth and family history, is required for completion of the health assessment and summary report, and should ideally be collated prior to the health appointment; CoramBAAF Forms M (mother), B (baby) and PH (parental health) can be used to collect this information. In addition, information held in the GP records together with other available medical and health reports, particularly where the child has a disability or serious medical condition, should be obtained.
- **In Scotland**, the Adoption (Disclosure of Information and Medical Information about Natural Parents) (Scotland) Regulations 2009 SSI 2009/268, may be helpful in obtaining certain medical information about the child's family, if adoption is the plan for the child. Regulation 11 says that where the agency has not been able to obtain information about whether there is 'any history of genetically transmissible or other significant disease' in the birth mother's or father's families, a medical practitioner, such as a birth parent's GP, must disclose such information to the adoption agency on request.
- A signed CoramBAAF **Consent Form** should accompany the request to complete Forms M, B, PH, IHA-C and IHA-YP (young person), to facilitate access to additional child or family health information.

Name NHS/CHI number DoB

Consent for health assessment

- The social worker should make every effort to obtain informed consent for the health assessment in advance, by having the consent section at the end of Part A of this form signed. This consent, unless the child has capacity to give his/her own consent, should be obtained from:
 - a birth parent with parental responsibility/ies; or
 - another adult with parental responsibility/ies; or
 - an authorised representative of any agency holding parental responsibility/ies.
- The child with capacity to consent may do so by signing the consent section at the start of Part B of this form at the time of the health assessment.
- Consent from birth parent(s) is best obtained at the time of placement. The birth parent/s may give consent by signing the LAC documents, and these should be available for the assessing health professional on request. Alternatively, the birth parent(s) may give consent by signing the consent section at the end of Part A of this form.
- The child's social worker should provide the assessing health professional with background details and the reason for the child being looked after, for example, a child protection or core assessment report. It is the social worker's responsibility to prepare the child, parents and carer for the assessment. If the child's *Personal Child Health Record* (red book) is not already in the possession of the carer, the social worker should obtain it from the parents and ensure it is brought to the health assessment.
- It is good practice for the social worker, and birth parent(s) where appropriate, to attend the assessment as well as the carer, thus ensuring that the health professional has up-to-date information on the child's background and family and personal history, and is able to receive directly any comments regarding the child's health. **The social worker should advise the health professional if there are any concerns about personal safety for all those attending.** The social worker should also alert the health professional to any addresses on the form that must not be shared with other family members.
- The social worker should ensure that arrangements are made for an interpreter or signer to be present if necessary.
- **The agency/social worker should be aware that it is the expectation of the LAC health team that they should be notified when actions from the recommendations in Part C are carried out.**

Part B: The health assessment and procedure for the assessing health professional

- Part B should be completed by the assessing health professional, who must have relevant experience and training to at least Level 3 of the RCPCH and RCN Intercollegiate Competencies. Regulations in England and Northern Ireland require a doctor to undertake the assessment; however, in Scotland and Wales this may be carried out by a doctor or nurse.
- Services should have a mechanism for identifying which health professional is best placed to undertake the assessment. If the child is already known to the community child health team, a paediatrician who knows the child may be better placed to provide a comprehensive report.
- It is important for any assessing health professional to seek advice and guidance when needed from a senior colleague with expertise. Although some specialist nurses have expertise in physical examination, medical oversight should be in place, and there should be an agreed pathway for the child whose IHA is completed by a nurse to see a doctor if needed.
- The purpose of the assessment should first be explained to the child, parent/s and carer.

Name NHS/CHI number DoB

- As indicated in Part A, the child with capacity to consent to the health assessment should indicate his/her consent by signing the consent at the start of Part B.
- Those present at the assessment should be listed at the beginning of Part B.
- It may be appropriate to see the child and the carer on their own for part of the assessment. It would also be appropriate to see the birth parent(s) alone to obtain their health history.
- The form should record the child's wishes and feelings regarding their present and future health and well-being.
- The forms are intended as guidance and should not replace clinical judgement. A box can be left blank if the question or issue is not relevant and should be marked N/A for 'not applicable' to indicate that the practitioner has considered it.
- The extent of the physical examination will depend on the age of the child and its appropriateness within the clinical context. For example, examination of the genitalia would not be routine in an older child if there is no clinical indication. Practitioners should clearly document what physical examination has been carried out.
- With appropriate consent (for example, using CoramBAAF Consent Form), health professionals should use all available information, such as community health, GP and hospital records, to inform the assessment. Additional information that is thought to be relevant may be available from other sources within the child's care network. The source of all information should be documented.
- For refugee and trafficked children, consider the impact on their health of their country of origin and route taken, experiences en route, entry point into the UK, infectious diseases, the impact of displacement, separation and loss, physical, emotional and sexual trauma, sexual health and mental health. See 'Additional Resources' for websites providing information on worldwide prevalence rates of HIV/AIDS and hepatitis as well as country-specific immunisation schedules and uptake.
- Since Part B may contain personal and sensitive information about other family members, as well as the child, it should be retained in the child's health record and treated with the utmost care with respect to confidentiality. For adoption only, a copy of the entire form will be sent to the child's adoption agency.
- Practitioners should be sensitive to the language used as this report may be shared across agencies, released in court proceedings and accessed by the child in the future.
- To the extent that is appropriate to their age and development, the issues raised in the report should be discussed with the child and they should be aware of what will happen next, including the sharing of information.
- For children placed out of area, the entire completed form including Part B should be sent to the looked after children's health team in the responsible/placing area.

Name NHS/CHI number DoB

Part C: Summary Health Report

- Part C is the summary report and health recommendations for the care plan. All of Part C will be needed by the social worker who has responsibility to formulate the health care plan, and the Independent Reviewing Officer (IRO)/reviewing officer who has responsibility to review the child's care plan. Completion of Part C in its entirety will provide the information required to fulfil the statutory requirements for the health care plan.
- **Part C should include an analysis of the child's personal and family health history and the implications these have for the child's current and future health and care needs.** Part C will be shared with adoption and fostering agencies.
- Part C should usually be completed by the assessing health professional. Occasionally it may be necessary for the looked after children's health team from the responsible/placing authority to assist in completion of Part C to ensure a comprehensive report.
- Health recommendations for the child care plan should be specific, time-bound and clearly identify the person responsible for each action. The plan should include upcoming appointments with dates and any outstanding issues such as immunisations. **It is the expectation of the LAC health team that they should be notified when actions are carried out.**
- Part C should include a list of all those who receive a copy of Part C; the list should include all those with responsibility for implementing recommendations for the child care plan.
- Part C can be used as the basis for discussion with current and future carers, provided informed consent has been obtained to disclose the information. **In Scotland**, regulations state that prospective adopters must be given full information about a child at the time of placement, including medical information on the child and his/her birth family. **In England, Northern Ireland and Wales**, it is good practice to disclose all relevant health information to prospective adopters.
- Part C may be released in court proceedings and may be accessed by the child at a later date, so it is important to be sensitive to confidentiality and the use of language.
- Statutory guidance for England states that the lead health record for a looked after child should be the GP-held record and that the entire initial health assessment and health plan, and subsequent review assessments and plans, should be part of that record.
- Consent issues when sharing third party information need to be carefully considered in light of what is relevant to the child and in their best interests.

Part D: Data collection and audit

- This is an optional section that LAC health teams may customise for their local data collection.
- In England, the National Tariff checklist, developed as a quality assurance tool for health assessments of children placed out of area, may be inserted here.

Use of electronic forms

- Please note that this form is now only available as an electronic template. The templates are provided by CoramBAAF to the fostering or adoption agency under a license agreement. Health agencies should get new and revised templates as necessary from the relevant fostering or adoption agency, including where any problems arise with the formatting of the document.
- If you are working with a printed copy and you do not have enough space to write, ask the agency that provided the form for an electronic template, as boxes in the template will expand as you type to allow sufficient space for full reporting/assessment.
- When it is appropriate to share Part C, a printed copy may be made by selecting the relevant page numbers of the completed Part C.

This information is confidential and is not to be divulged without authorisation of the health adviser. A copy of this entire form will be sent to the child's adoption agency, and in England to the GP as the lead record holder, as required by statutory guidance.

The child should be accompanied by his/her carer and, if possible and appropriate, a birth parent. Informed consent to health assessment is needed from an adult with parental responsibility/ies or someone otherwise entitled to consent, unless the child has capacity to consent for him/herself. For consent to access family health information, a signed CoramBAAF Consent Form (or photocopy) must be attached.

Part A To be completed by the agency – type/write clearly in black ink

Form to be returned to the agency health adviser:

Health adviser's name			
Address			
Postcode		Telephone	
Email		Fax	

Child		Interpreter/signer required?	Yes/No
		Arranged?	Yes/No

Name NHS/CHI number DoB

Part B To be completed by the examining health professional and retained within the child’s health record. A copy of this entire form will be sent to the child’s adoption agency, and in England to the GP as lead record holder, as required by statutory guidance. The child should be told about the reasons for the assessment and that information will be shared, and their views obtained.

Consent by the child with capacity to consent is essential.

Does the child have capacity to consent? Yes/No If not, then check for signed consent in Part A

Consent by the child

I understand the reason for this health assessment and I agree for it to take place. I understand that following this assessment, recommendations for my health care plan will be drawn up. A copy of Part C will be given to me and my social worker. I consent to copies also being sent to my carer, birth parent(s), GP and school nurse/doctor (delete or add as necessary).

In adoption, I understand that this entire form will be sent to my adoption agency and that the information in it should be shared with my prospective adopters.

Signature _____ Date _____

List name and role of all those present at assessment			
Child seen alone	Yes/No	If no, give reason	
Carer seen alone	Yes/No	If no, give reason	

1 Health discussion _____ Date _____

Is the child **currently well**? Does the child or carer have any concerns about the child’s health or well-being, e.g. eating, sleeping, development, school, behaviour? Does anyone else involved with the child have any concerns?

Is the child enjoying life and achieving, e.g. wishes and feelings, interests, activities, hobbies, friendships, school, likes and dislikes?

How long has the child been in this placement and how is it going? (See also sections 4, 5 and 6)

Form IHA-C

CONFIDENTIAL

Name NHS/CHI number DoB

For refugee and trafficked children, consider country of origin and reason for leaving, route taken, experiences en route, entry point into the UK.

Are there any concerns about vision? Has it been tested?

Are there any concerns about hearing? Has it been tested?

Does the child have any current health problems, known conditions or diagnoses? Are they receiving any special support or allowances?

Is the child attending any **health or therapy appointments**? Are there any outstanding?

	Name	Address	Give details/date of last visit/treatment
Health visitor/school nurse

3 Health history

Personal health history including summary of CoramBAAF Forms M and B where available (request if not provided)

- a. **Antenatal/birth** including use of tobacco, alcohol, drugs, risk taking behaviour, gestation, time and place of birth, mode of delivery, birth measurements, resuscitation required, Apgar scores.

- b. **Neonatal** including feeding details and parents' care of baby.

- c. **Past health history** including growth, illnesses, hospital admissions and accidents (consider female genital mutilation (FGM)). For refugee and trafficked children, consider risk of infectious diseases contracted in country of origin or en route, physical, emotional and sexual trauma and mental health.

Family health history including genetic disorders, mental health difficulties, learning difficulties taken from CoramBAAF Form PH or if different, **state source**. Please indicate if no family history is available.

Mother

Father

Siblings (state whether full or half siblings)

4 Social/care history including abuse, neglect, exposure to domestic violence, lifestyle issues, and any risk of blood-borne or other infections

5 Impact of contact with birth family including positives and negatives and child's wishes and feelings, e.g. enjoyment, changes to routine, missed activities, anxiety, behaviour, quality of contact arrangements, whether anything could be done to improve contact (please state whose view this is)

Name NHS/CHI number DoB

6 Emotional and behavioural development including play, attachment, concentration, relationship with current carer, including CoramBAAF Carers' Report and SDQ date and score when available. For refugee and trafficked children, consider the impact of displacement, separation and loss and physical, emotional and sexual trauma.

Are there any significant **behaviour problems** or difficulty relating to carers, other significant adults and peers, e.g. bullying? How is the child coping with bereavement or loss of family, friends, pets, etc? Does the child have a trusted adult to talk to?

7 Safety and health promotion

Does the child smoke?	Yes/No	Use e-cigarettes?	Yes/No
Does the carer or anyone else in household smoke?	Yes/No	Use e-cigarettes?	Yes/No

Are there any current risks to safety, e.g. safe storage of e-cigarettes and medicines, pets, domestic violence, substance misuse, road danger, stranger danger, sexual exploitation, female genital mutilation, cultural or gender risks, e-safety, self-harming behaviour?

Would it be appropriate for the child to have any further discussion or any information about keeping healthy, e.g. skin or hair care, diet, exercise, puberty, relationships, gender identity, sexual exploitation, domestic violence, smoking, alcohol, street drugs, etc? Does the carer need any information or support?

8 Physical examination Date Age

General appearance/presentation, including evidence of non-accidental injury.

It is good practice for the examining health professional to discuss the issues raised in this report with the child, where it is appropriate, and to seek appropriate consent for further dissemination of information. The examining health professional or agency health adviser should discuss the issues and their implications for the child with any future carers.

Please respect confidentiality and take care whether or not to share personal health information.

Name NHS/CHI number DoB

Part C should be retained in the child’s health record and a copy sent to the social worker. This summary should be an analysis of the child’s personal and family health history and the implications these have for the child’s current and future health and care needs.

All of Part C will be shared with adoption and fostering agencies to ensure that the social worker has all the data needed to formulate the health care plan. It is good practice, with informed consent, to share this information with the child’s current and future carers. A copy of this entire form should be sent to the child’s adoption agency, and in England to the GP as lead record holder. Throughout the UK, it is good practice to disclose all relevant health information to prospective adopters; in Scotland this is mandatory.

Summary report from examining health professional (complete every section)
